

HighPoint Solutions, a Company that Keeps On Growing

July 29, 2013 -- HighPoint Solutions LLC, a Philadelphia based IT consulting firm focusing on Life Sciences and Healthcare, has announced that they are expanding their headquarters. This expansion will enable HighPoint to add another 100 jobs to the Philadelphia area beyond their existing 500 employees.

The new facility will be adjacent to the current space the company occupies at the moment, and HighPoint has already started recruiting for several jobs within the business solutions, technology, talent acquisition and operations areas.

“As we continue to expand our client base nationally, and with plans to open offices in Europe in the near future, the time is right. We’re making a \$3M worth of investments in 2013 alone. This expansion allows us to better serve our customers and have a much stronger presence in the local area, nationally and abroad”, said Chief Executive Officer, John Seitz.

Moving forward, HighPoint Solutions has set their goals high. The company is on a path to, not only, continue their 20%+ YoY growth, but become the largest, privately held consulting firm serving the Life Science & Healthcare marketplace by 2017.
